FOR JACKET BUYERS

Karachi, Sialkot and Lahore Quote Comparison Sheet

Put up to three leather jacket quotes on one page. Fill part 1 for every factory, add the cost to reach the port in part 2, then score the factory in part 3. Compare on the same spec, or the cheapest quote will fool you.

1. The factory and the quote

Item	Karachi quote	Sialkot quote	Lahore quote
Factory name and contact			
City and area (e.g. Korangi, Sambrial)			
Factory type: export unit / workshop			
Jackets they make most (fashion, biker, riding)			
Leather quoted: type, grade, thickness			
Lining and hardware quoted (YKK? quilted?)			
MOQ per style / colour			
Sample cost and sample time			
Bulk lead time after sample approval			
Price per jacket at your quantity			
Price basis: FOB Karachi or ex-works?			
Payment terms (deposit / balance)			

Same tech pack to every factory. A quote without lining, labels or packing is not cheaper, it is incomplete.

2. Cost to reach the port (per jacket)

Item	Karachi quote	Sialkot quote	Lahore quote
Price per jacket from part 1			
+ inland freight to Karachi (if ex-works)			
+ export packing and labels (if extra)			
+ inspection cost per jacket			
= Real FOB Karachi price per jacket			

Karachi factories are in the port city. Sialkot orders clear at Sialkot Dry Port and travel to Karachi; Lahore orders go by road or rail. For your price at the door, use the free landed cost calculator.

3. Score the factory (0 = no, 1 = partly, 2 = yes)

Item	Karachi quote	Sialkot quote	Lahore quote
Showed jackets they made in my style			
Named the tannery and hide grade			
Video call or visit of the cutting and stitching floor			
Sent a size chart and grading rules			
Agreed to a paid sample in my exact spec			
Agreed to an inspection before balance payment			
Answered clearly within 1 to 2 days			
Total score (out of 14)			

Decide: choose the factory with the best total score whose real FOB price fits your budget, not simply the lowest price. Before bulk, approve a pre-production sample in writing.
